USC Welcome Week Spring 2017

Event: USC GeoScavenge

Presented by USC Dornsife Spatial Sciences Institute

Overview

Become familiar with the landmarks, layout, history, and resources of the USC University Park campus as you use your smart phone to scavenge and locate clues and their hidden prizes. Visit and register as many items as you can! Team prizes awarded for sites visited. This activity can be completed individually or as a group (maximum 5 people).

Required Resources

-Smart phone

-Internet access

-QR Code scanner app (search: Scan)

QR Code: GeoScavenge Map

Instructions

Use directions and clues provided in the webmap to locate landmarks on campus. Once you find a designated landmark, scan the QR Code, respond to the question, and include your team name. You have now completed one GeoScavenge site. Try to be discrete, and leave landmarks and qr-codes in the same location and condition as you found them. Make sure your team name is unique and be consistent each time you report your team name.

When and Where

This event will be held on Friday, January 6 from 3-5pm. The event will launch from Tommy Trojan at 3pm — don't miss out on this event! Return to Tommy Trojan for event recap and prize ceremony.
